

# FOLLOW THE STEPS BELOW TO ADD YOUR SUBJECT TO ANY OF OUR “PAINTED ” SERIES TEMPLATES

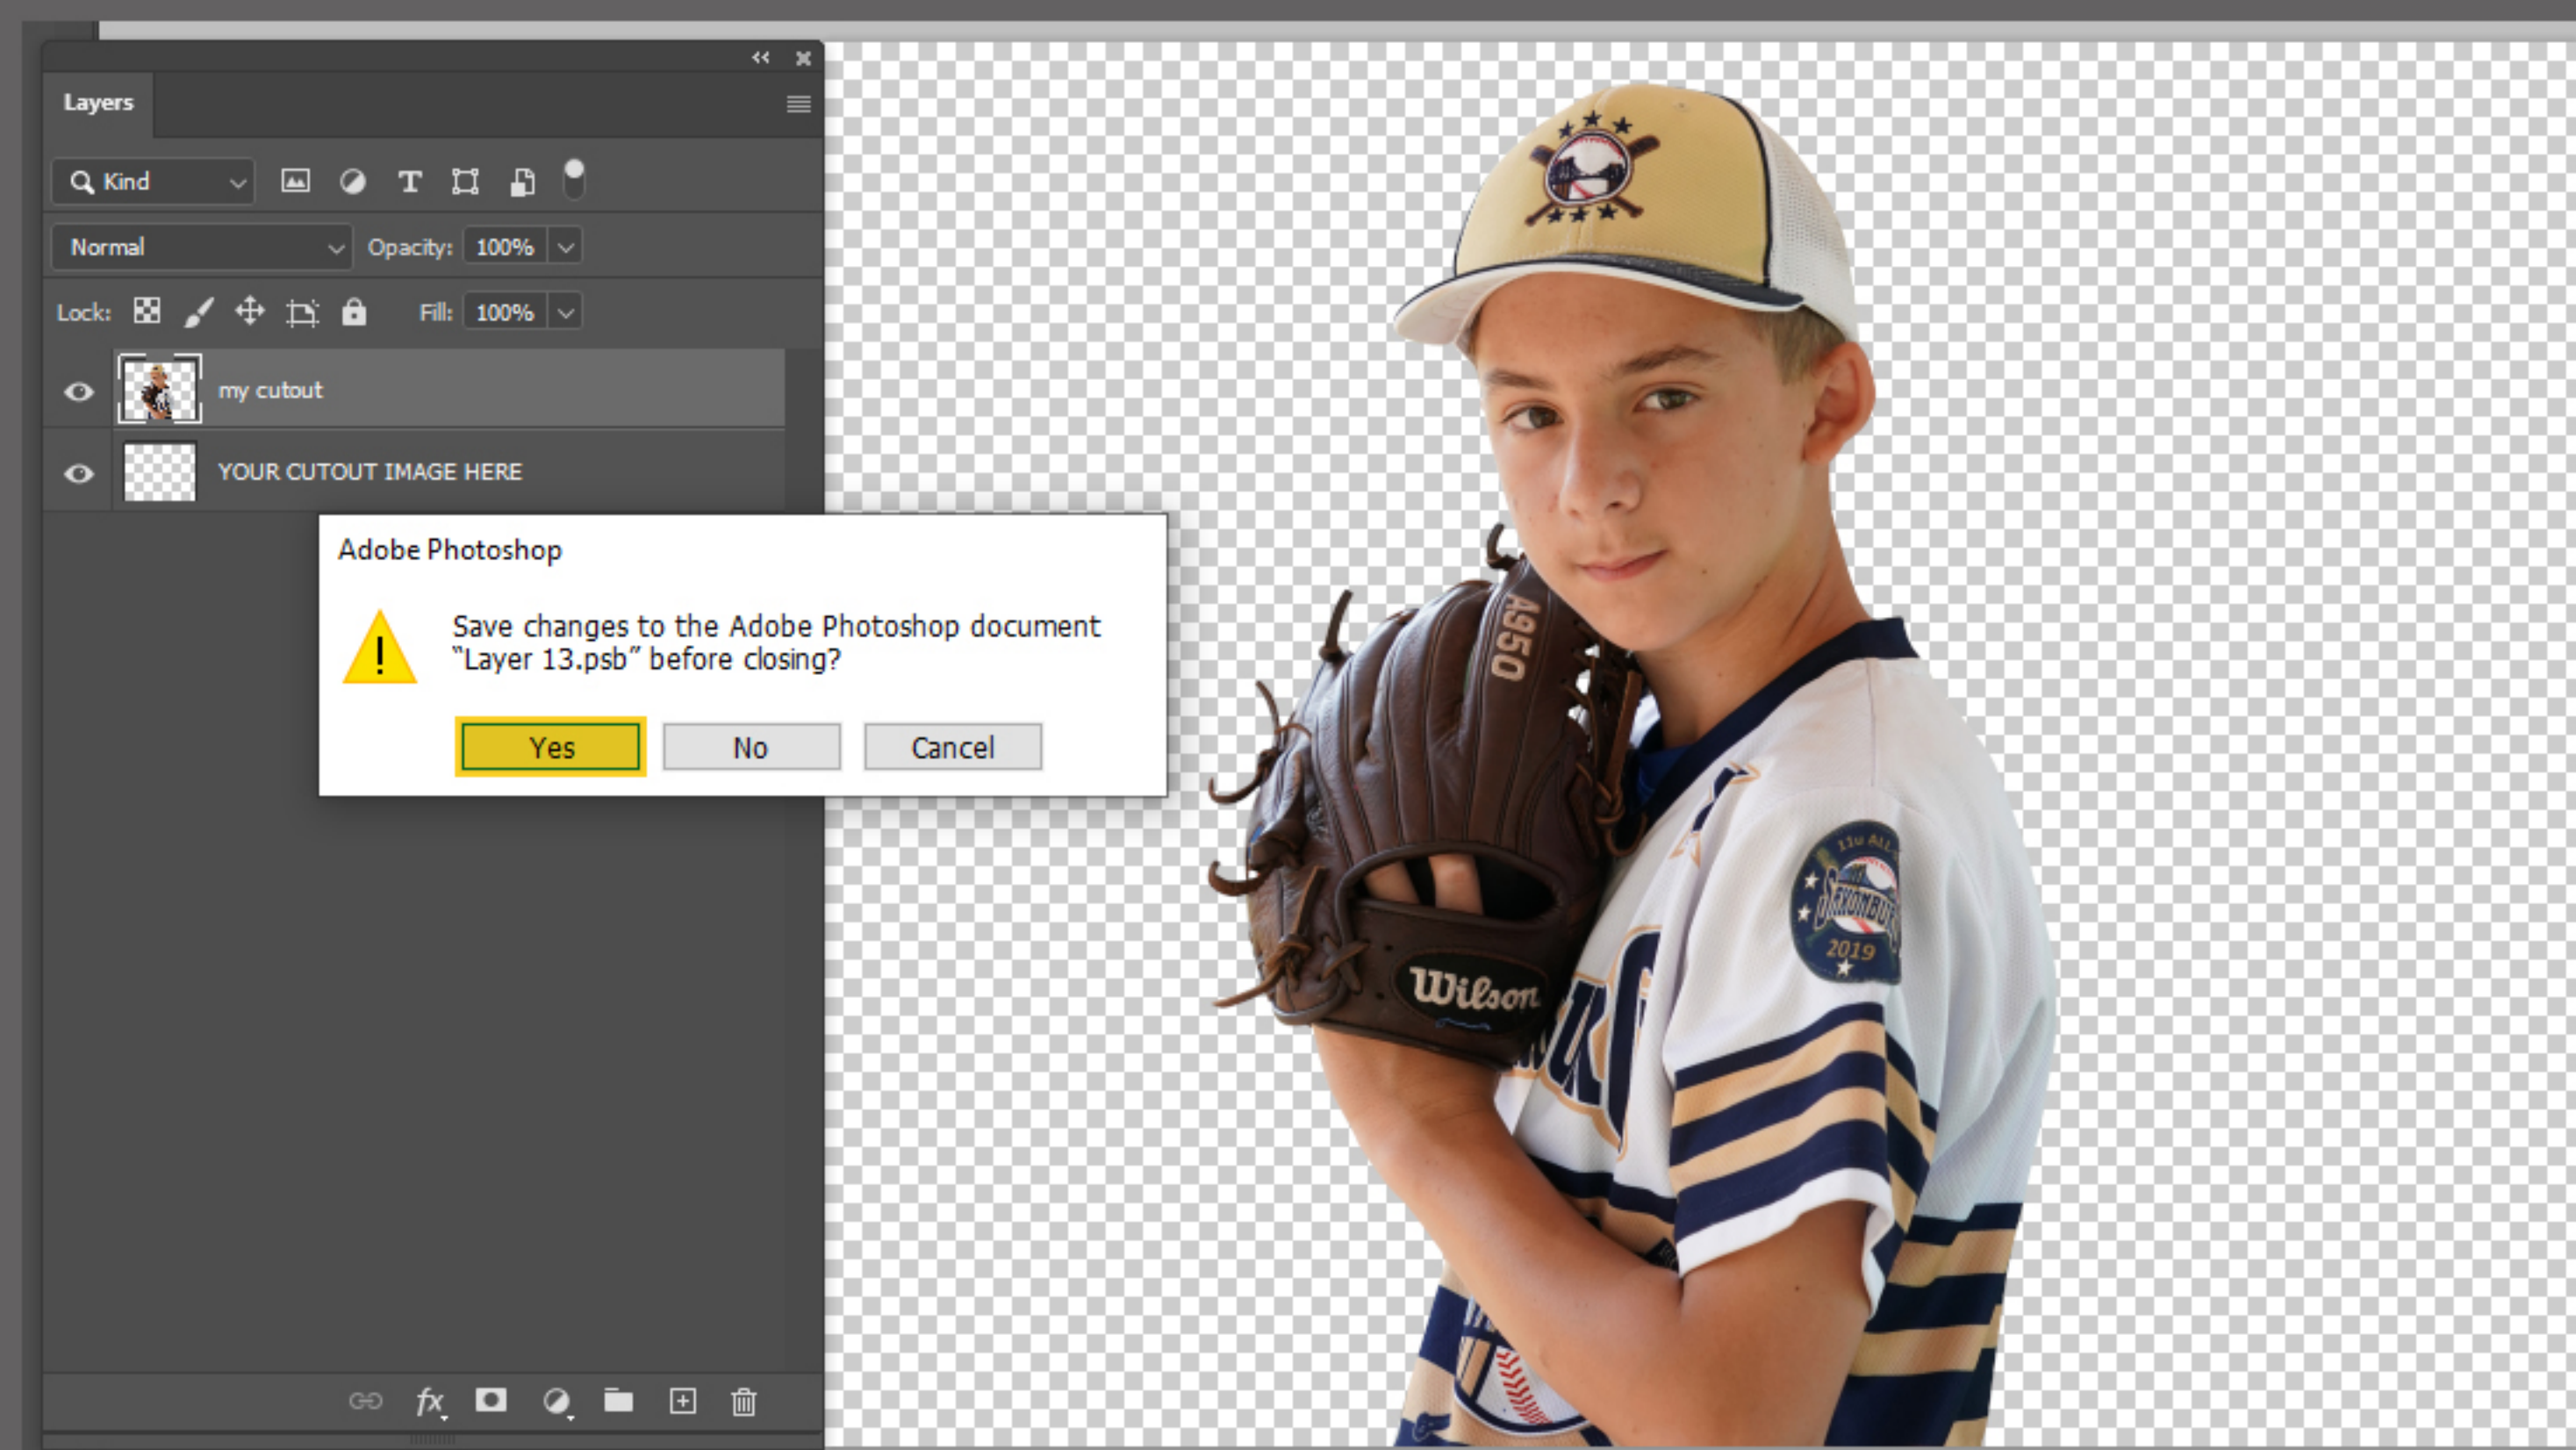

**STEP 1:** Cut your subject out of the background and apply the layer mask. Follow the masking tutorial included with this download or watch the video tutorial on the product page.

**STEP 2:** Double click on the smart object on the very first layer of the template named “Double Click To Add Image Here”. This will open your smart object so you can add your player.

**STEP 3:** Bring your cutout image over into the smart object window that opens and put it right above the layer named “YOUR CUTOUT IMAGE HERE”. Now close this window and choose “YES” to save changes.

**STEP 4:** Unlink the smart object from its layer mask so you can move and resize your image or the mask independently.

**STEP 5:** Edit and reposition text as needed.
