

Photoshop Mid Course Exam

Assignment: Create a four picture (five for some) portfolio and share it with me. Name the portfolio **Graphics Class Mid Course Exam** (10 points). Each picture will be worth 100 points. Some of the pictures will take longer than others, so don't waste your time. You may work on the photos in any order you like. As part of the grade, you will need to keep track (write down) of the changes you make for each picture, so that you can explain the photos to me in portfolio. Create a box next to the photo and tell me about the photos. (25 of 100 points)

Picture #1

Send a teacher or staff member on vacation. In this project you will pick a teacher/staff member from this school (can't be me) and put them into a background of a place where they have never been before. You will be graded on the following criteria: selection quality, sizing, how real life the photo seems and lastly your record of changes made

Picture #2

Take a new photo of someone in this school and give them an identical twin. Choose a photograph that will lend itself to making this look as real as possible. The twin picture always looks better if the twin is separated from you or on the opposite side of the photograph. You will be graded on the same criteria as above in picture #1.

Picture #3

Choose ONE of the photos that I emailed you. Give every person or animal in the picture a hat. I will email you the photos to use. The hats should be sized and look appropriate for the picture. You will be graded on the same criteria as above in picture #1.

Picture #4

Create a cereal box featuring a Boquet Valley Athlete (Google cereal box with athlete to see example) You will be graded on the same criteria as above in picture #1.

Extra Credit Picture #5

Create an artistic picture of yourself or one of your friends. You can do this in any manner of ways you choose, but the filters are probably a good place to start. This image is worth up to 25 points.
