

# Photoshop Scavenger Hunt

## *A Review of the Basics*

1. Where do you go to start a new print document?
2. Where do you go to open a photoshop document or image?
3. What is the difference between “opening” and “placing” an image into Photoshop?
4. What do you have to ensure before making edits on a particular layer in a document?
5. How do you change the color mode in your document?
6. How do you change the size of your document?
7. How do you add a border to a layer?
8. What tool do you use to give your text the fill of a background image?
9. What steps do take to adjust the size of an image, such as a shape?

10. What tool do you use to “steal” color from part of your image or from another image?

11. What tool should you use to make a selection of an image with an odd shape?

12. How do you get two tabs to appear side-by-side in Photoshop?

13. Where can you find pre-made shapes, like hearts, trees, and flags?

14. What tool allows you to make colors adjust from one part of your shape to another?

15. What tool can you use to fix minor details, blemishes, dust, etc. in an image?

16. What tool allows you to lighten areas of an image?

17. What “quick fix” editing tool can you use to reduce the size of your image and cut out areas on the outer edges?

18. What is the purpose of the Clone Stamp Tool? Explain its function in your own words.

19. What correction tool allows you to replace large pieces of an image with another part of an image for corrections?
  
20. What tool allows you to make your image look like it was created using a colored pencil?  
How do we get there?
  
21. Explain in your own words how the Magic Wand Tool works.
  
22. If you wanted to put your head on your favorite cartoon character's body, what selection tool(s) might you use?
  
23. Why do we use layers?
  
24. How do you make a layer "disappear" without deleting it from your document?
  
25. How do you rearrange layers? What does this do?
  
26. What is the purpose of the blending mode?

27. How do we make a layer “see through”?

28. How do you make a group of layers?

29. How do you unselect a selected area?

30. If you made changes to a document and you wish to go back to the original version, what steps do you take to do so?
