

Work as a meteorologist

In this activity, you will be a meteorologist for a day. You will gather weather data for a city and create a Google Slide presentation for the information you collect.

Step 1

Gather data for a weather report

On Chrome, go to this site: <http://www.weather.com/>.

In the Local Forecast search area, type in the name of the city you are researching.

Gather data for your weather report. Be sure to include:

- Current conditions
- Temperature
- Humidity
- Wind
- Precipitation
- Current Doppler image
- 5-day forecast
- For the last part of your forecast, include a three sentence statement on how you think the weather will affect people in this city. Is there anything in the forecast that might affect people's daily routines?

Step 2

Create your Google Slide Presentation.

Requirements:

8 Slides (Title Slide, Then 1 for each condition listed above) Each slide must have a background.

There must be animation on at least three slides
